- Altor Fund II closed in March 2006 with committed capital of EUR 1,150 million

Altor's latest funds are structured in a way that allows for significant additional equity contributions, which means that we can continue owning and investing in our portfolio companies over an extended period of time, supporting add-on acquisitions and strategic growth-oriented initiatives. The flexible structure of the fund also allows Altor to selectively invest in public companies and in growth cases through minority shareholdings and partnerships.

Altor Fund IV and Fund V are domiciled in Sweden and are managed by Altor Fund Manager AB which stands under the supervision of the Swedish Financial Supervisory Authority as an authorized manager of alternative investment funds under the Alternative Investment Fund Managers Directive.
